Informed Consent for CS160 User Interface Testing

Before agreeing to participate in this research study, it is important that you read the following explanation of this study. You may withdraw from the study at any time. No guarantees or assurances can be made as to the results of the study.

<u>Explanation of Procedures</u> This research study is designed to assess the effectiveness of a proposed user interface for an iPhone application created by students in CS160. Specifically, we will be esting the interface to Roll Call, an attendance application created by Group G of CS160. A video camera will be used to capture interaction with a interface prototype. This camera will only capture images of a users' hands. Audio will also be recorded.

<u>Risks and Discomforts</u> There are no risks or discomforts that are anticipated from your participation in the study.

<u>Confidentiality</u> The information gathered during this study will be made available on the class website in the form of a written report. Your privacy is very important, so no identifying information will be included.

I freely and voluntarily consent to participate in this study. I understand that I may withdraw my consent and discontinue my participation at any time.

I have read and understood the foregoing and received a copy of this form.
