

Remove Blemishes

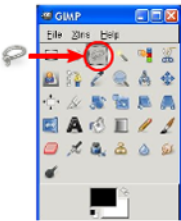

Before

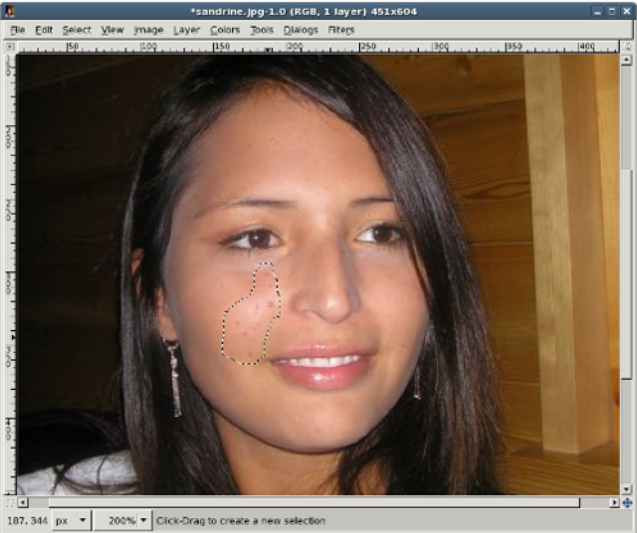

After

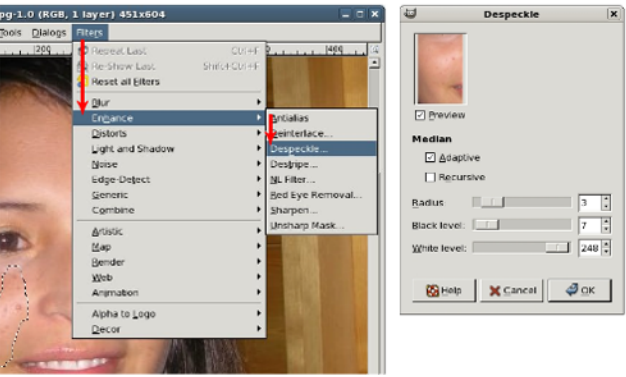

1 Select the free-select tool from the toolbar to select a hand-drawn region.

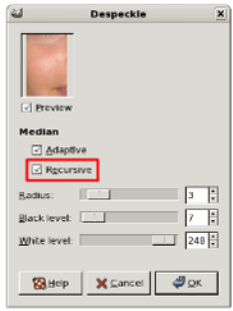

2 Use the free-select tool to select the left cheek.

3 Select Filters> Enhance> Despeckle from the image menu bar to remove speckle noise from the image. You will see a new dialog appear.

4 Select Recursive in the Despeckle dialog.

5 Set the Black Level slider from 7 to 155 in the Despeckle dialog.
